## Product Care & Maintenance

### RECOMMENDED USES

For the porcelain slabs to conserve their original beauty, these guidelines should be followed:

- Use wooden chopping boards to cut food. Ceramic knives have a similar hardness to the countertop and so they should not be used to cut things on its surface.
- Despite being a material of great hardness, it is not recommended to clean the Ceralsio surface with materials whose hardness is higher than porcelain.
- Countertops with polished finishes or dark colours are easier to scratch and so metal objects should not be dragged directly across their surfaces.

### KNOCKS

Ceralsio porcelain slabs stand out for their hardness and resistance. Even so, care must be taken with those parts of the worktops and countertops most exposed to knocks, such as corners, edges and bevel edges.

### CLEANING

Ceralsio has an almost non-porous surface and so it is easy to clean. Even so, a series of guidelines should be followed to remove different everyday stains typically found in kitchens and bathrooms.

The stains should be cleaned away as soon as they occur, using a cloth moistened with water, to prevent them from drying. In the case of dry stains, moisten the area with hot water to soften the dirt and then remove it with a clean cloth. Before any type of special cleaning product is used on porcelain slabs with a polished finish, test it out on an area that is not very visible to check that the shine or colour is not affected by the product.

## **Ceralsio Polished Finished Slabs Special Care Consideration**

Ceralsio Polished finish, unlike the other Ceralsio finishes (known for its extreme resistance to scratches, abrasion and harsh chemicals amongst others) and similarly to other polished man-made surfaces or engineered stone, is a more delicate texture that requires more care and precaution when it comes to scratches and the use of aggressive households cleaning products.

Ceralsio Polished Slabs are recommended for residential use in the countertops applications, Interior and exterior cladding.

Cleaning of Ceralsio Polished surfaces should avoid the use of rough sponges and steel wool as well as caustic soda, abrasives cleansers or products with a ph greater than 11. Avoid also direct contact of

bleach. Use pads, cloths, napkins and glass coasters to place cooking pots or other kitchen hardware

on the surface. Never cut food directly on the counter, use a cutting or chopping board. Do not pull or drag kitchenware, pans and appliances on the counter.
